A touch of genius

Intuitive access

Clear understanding

Unrivalled decision support

Instantly realise your Digital Asset through a uniquely simple touch-driven interface. Powerful and intuitive, AVEVA Engage removes barriers to collaborative decision making. It provides instant access to the information you need to make informed decisions, visualised in Ultra High Definition (UHD), literally at your fingertips. At every stage of the project or asset life cycle, AVEVA Engage can improve the speed, accuracy and reliability of your decision making.

Key Features

Powerful Visualisation

- Entirely touch-driven
- UHD, whole model visualisation with immediate response to movement and manipulation
- Section and view internal details of the model

Immediate Information Retrieval

- Every tagged object is selectable, and is backed up with the full contextual information that resides in your Digital Asset, available to be recalled and viewed at the touch of the screen

Information Context

- View whatever engineering data and drawings you need – schematics, equipment drawings, single-line diagrams, instrument loops or layout plans – in context with the 3D model, for more fully informed decision making

Benefits

- Understand your asset data in ways never before thought possible
- Combines easy access and understanding with the power of validated information, to support multi-discipline decision making across the project or asset life cycle
- Extends the benefits of 3D visualisation and Information Management to decision makers at all levels, in all disciplines
- Reduces errors and delays by increasing the understanding of complex assets
- Delivers immediate value, through rapid deployment and minimal user training
